

# RESEARCH DATA MANAGEMENT POLICY

- 4.2 **Principle 2** Institutional and project specific data management policies and plans should be in accordance with relevant standards and community best practice. Data with acknowledged long-term value should be preserved and remain accessible and usable for future research.
- 4.3 **Principle 3** To enable research data to be discoverable and effectively re-used by others, sufficient metadata should be recorded and made openly available to enable other researchers to understand the research and re-use potential of the data. Published results should always include information on how to access the supporting data.
- 4.4 **Principle 4** RCUK recognises that there are legal, ethical and commercial constraints on release of research data. To ensure that the research process is not damaged by inappropriate release of data, research organisation policies and practices should ensure that these are considered at all stages in the research process.
- 4.5 **Principle 5** To ensure that research teams get appropriate recognition for the effort involved in collecting and analysing data, those who undertake Research Council funded work may be entitled to a limited period of privilege use if the data they have collected to enable them to publish the results of their research.
- 4.6 **Principle 6** In order to recognise the intellectual contributions of researchers who generate, preserve and share key research datasets, all users of research data should acknowledge the sources of their data and abide by the terms and conditions under which they are provided.

## 7.2 University responsibilities

7.2.1 The University of Law will engage with internal and external stakeholders to ensure research data management is effective and secure.

7.2.2 The Research Institute is responsible for the monitoring of research outputs and compliance with the research data management policy. The Research Institute will submit research activity statements to the Academic Board every
